

Khadija Zouhair

khadijazouhair2004@gmail.com — (+212) 629 139 309 — Khouribga, Morocco
LinkedIn — GitHub — Portfolio

PROFILE

Final-year Computer Science and Data Engineering student seeking a Machine Learning / AI internship. Experienced in developing and deploying ML models, data preprocessing, and extracting actionable insights. Motivated to contribute to innovative AI projects and deliver business value.

EDUCATION

- ENSA Khouribga — Engineering Cycle, Computer Science and Data Engineering 2024–Present
- 1337 Coding School (UM6P), Khouribga — Software Development Training 2024–Present
- ENSA Khouribga — Integrated Preparatory Cycle 2022–2024
- HASSAN II High School, Benslimane — Baccalaureate in Physical Sciences (Very Good) 2021–2022

PROFESSIONAL EXPERIENCE

- **AI Intern** — OCP Group, Khouribga, Morocco Jul 21, 2025 – Sep 21, 2025
 - Developed and deployed ML models (LSTM, GRU, TCN) for predictive analytics.
 - Performed data preprocessing, feature engineering, and exploratory data analysis.
 - Automated reporting and chatbot integration using **n8n**.
 - Collaborated with software engineers for model integration and optimization.
- **Organizing Committee Member** — DataVerse 3.0 2024
 - Coordinated event activities and facilitated collaboration among participants.

TECHNICAL SKILLS

- **Machine Learning & AI:** Python (Pandas, NumPy, Scikit-Learn, TensorFlow, Keras, PyTorch), Deep Learning, LSTM, GRU, TCN, Computer Vision, NLP basics, GPT embeddings, LangChain
- **Backend Development / Web Frameworks:** Node.js, Express, Flask, FastAPI
- **Frontend Development:** React, Next.js, HTML, CSS, Bootstrap, Tailwind
- **Databases & Data Handling:** SQL, MongoDB, Hadoop, Big Data Processing, Feature Engineering, Data Cleaning
- **Data Visualization:** Matplotlib, Seaborn, Power BI, Qlik Sense
- **DevOps & Cloud:** Docker, AWS, n8n Automation
- **Modeling & Tools:** UML, Merise
- **Operating Systems:** Windows, Linux, MacOS

PROJECTS

- **AI & Cybersecurity SaaS Platform** — Developed a SaaS platform with RAG chatbot and cybersecurity tools using Python, LangChain, ChromaDB, GPT embeddings, Node.js, Express, Next.js, React, MongoDB, Docker, FastAPI, and AWS for secure, scalable, context-aware solutions.
- **Customer Churn Prediction** — Applied Random Forest model on telecom dataset to predict customer attrition and improve retention strategies.
- **Rihla Travel Planner** — Flask app generating personalized itineraries using Qloo Google Gemini APIs.
- **Sales Dashboard** — Data analysis and visualization using Python and Qlik Sense for business insights.
- **Web Chatbot** — Built an interactive bot for customer engagement using HTML, CSS, JavaScript.
